

ALGEBRA 2 HONORS

PROBLEM SET 01

DUE DATE: JANUARY 11, 2024

Question 1. Compute the x -intercepts, the vertical asymptotes, and horizontal asymptote for each of the following rational functions:

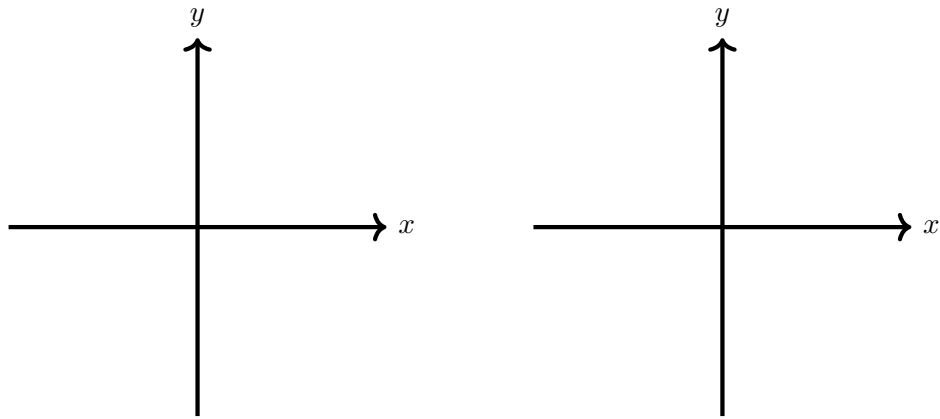

Function	x -intercepts	Vertical Asymptotes	Horizontal Asymptotes
$f(x) = \frac{2x - 6}{(x + 2)(x - 1)}$			
$g(x) = \frac{(x + 1)(x - 23)}{x(x - 2)}$			
$h(x) = \frac{(x + 5)^2(x - 3)}{(x - 3)(x + 3)}$			
$j(x) = \frac{x^2 - 2x + 1}{x^2 + 9x - 10}$			

Question 2. Let $f(x) = \frac{x^2}{x}$ and $g(x) = x$. Is $f(x) = g(x)$? Justify your answer in one sentence.

Question 3. Let $f(x) = \frac{x - 3}{x + 6}$ and $g(x) = \frac{2x^2 - 4x + 2}{x^2 + 9x - 10}$.

For $f(x)$ and $g(x)$, find

- (1) Domain
- (2) x -coordinate of any holes
- (3) x -intercepts
- (4) Vertical asymptotes
- (5) Horizontal asymptotes
- (6) Graph them using a sign chart!

Question 4. Draw the sign diagrams for each of the following graphs (use x -intercepts and vertical asymptotes).
